## TAKASHI MURAKAMI. UNDER THE RADIATION FALLS

The exhibition is the first major survey of Takashi Murakami's work in Russia, spanning several periods of the artist's career from the mid-1990s to the present, and includes a number of new works. Developed in close collaboration with the artist, the exhibition consists of five sections, each of which explores a particular phenomenon in Japanese culture and presents a variety of works ( paintings, drawings, installations and films) from public and private collections. This homage to the playful artist's world will take place as part of the Year of Japan in Russia.

### PAUL KLEE

The upcoming retrospective dedicated to the Swiss artist will present around 100 works from throughout Klee's career, starting in 1913, bringing together major masterpieces and rarely exhibited works that present the artist in a surprising new light. The exhibition is devoted to Klee's abstract production, works, a previously little-explored aspect of his artistic production. The Fondation Beyeler museum, designed by Renzo Piano, is one of the world's most important art museums. It is now making Ernst and Hildy Beyeler's legendary art collection accessible to the public.
